The City of Lodi hereby agrees to cooperate as a partner member of the San Joaquin Substance Abuse Prevention Partnership. Further, the City of Lodi will be an active participant in the Community Coalition providing leadership and oversight for the execution of the goals to prevent alcohol and other drug abuse in our county. As a member of the Prevention Partnership, we will actively promote and participate in the goals and activities of the Partnership.

The San Joaquin County Office of Substance Abuse is the lead agency applying for this Prevention Partnership grant on the behalf of our coalition of public and private organizations.

## LONG-TERM SPECIFIC AIMS (Five-Year)

### GOAL ONE

Promote long-range, comprehensive, community-wide, grassroots based planning by a partnership of both public and private groups and individuals to reduce environmental risk factors and increase protective behaviors related to alcohol abuse and drug use in San Joaquin County.

### GOAL TWO

Achieve a measurable and sustainable reduction of alcohol and other drug use among county youth.

### GOAL THREE

Reduce incidence of alcohol and other drug related consequences in the county. Alcohol and drug related consequences include crime, illness, injury and death, employee productivity, child abuse and domestic violence.

### GOAL FOUR

Empower neighborhood and community groups to organize and take action to achieve alcohol and other drug abuse reduction within their population.

Page Two

The City of Lodi as a coalition partner endorses the following components of the Prevention Project as important elements to reduce alcohol and other drug use and misuse.

- Community Empowerment

Enhance the ability of grassroots level community groups to plan and develop strategies to reduce environmental risk factors in their community. Community is used to mean a geographic target area, an ethnic/cultural group or a special needs group (HIV/AIDS seropositive, sight/hearing impaired, developmentally disabled, etc.)

- Leadership Enhancement

Youth and adult leaders among the target group populations will be identified and provided with the resources to develop and enhance their leadership abilities and to be role models.

- Service Systems Coordination

Shift the emphasis among providers within services systems to a concept of response to client established needs. Instead of individual service systems establishing goals independent of one another and the target populations, the target groups will establish goals to which the service systems will design coordinated responses. The goal in this component is to use limited resources to address locally established priorities to the extent possible.

- County-Wide Coalition

The county-wide coalition will build upon the foundation provided by the Master Plan Substance Abuse Task Force formed in 1990. This group will incorporate members of the Drug and Alcohol Advisory Boards, service provider and the business community. Each coalition member brings its resources to be used by the Coalition. The Coalition provides direction and oversight to the Prevention Partnership Project. It will maintain primary responsibility for county-wide impact on workplace issues, multimedia messages and marketing the goals of the project.
